Scanfil plc Inside Information 11 December 2024 at 4.00 p.m. EET

Scanfil revises its turnover and operating profit downwards for 2024

Scanfil's fourth quarter will be strong, as expected. Towards the end of the quarter, material shortage challenges related to a few customer deliveries and a slight softening of the demand will lower turnover and operating profit.

The new outlook for 2024:

Scanfil estimates that its turnover for 2024 will be EUR 770–780 million and its adjusted operating profit will be EUR 53–54 million.

The previous outlook for 2024, issued on 10 June 2024:

Scanfil estimates that its turnover for 2024 will be EUR 780–840 million, and an adjusted operating profit of EUR 54–61 million.

Scanfil publishes its January-December financial statements report on Friday, 21 February 2025 approx. at 8.00 am EET.

Scanfil plc is Europe's largest listed provider of electronics manufacturing services (EMS), whose turnover in 2023 amounted to EUR 902 million. The company serves global sector leaders in the customer segments of Industrial, Energy & Cleantech, and Medtech & Life Science. The company's services include design services, prototype manufacture, design for manufacturability (DFM) services, test development, supply chain and logistics services, circuit board assembly, manufacture of subsystems and components, and complex systems integration services. Scanfil's objective is to grow customer value by improving their competitiveness and by being their primary supply chain partner and long-term manufacturing partner internationally. Scanfil's longest-standing customer account has continued for more than 30 years. The company has global supply capabilities and 11 production facilities across four continents. www.scanfil.com
